PROJECTS

Password Manager

[\(Site Link\)](#)

- Created a password management application that is both effective and safe.
- A dynamic and responsive user interface was built using **React JS** and a modern appeal was added by **Tailwind CSS**. Functionality for the safe storage, retrieval, and management of passwords was introduced.
- Gave the users a trusted tool for credentials' management while improving their cyber security and making it easier to use lots of accounts.

Todo App

[\(Site Link\)](#)

- Developed elaborate Todo application with a lot of features to handle task management.
- Submitted the app with **React JS** ensuring the users have seamless experience and updating of tasks in real-time, drag and drop feature, and management of the state.
- Gave users a chance to arrange their tasks in a much better way, improving their productivity as well as time management.

My Portfolio Website

[\(Site Link\)](#)

- Created a portfolio website that displays my skills, projects and achievements.
- Used the programming languages such as **HTML**, **CSS** and **JavaScript** to code the site with an organized design and seamless transitions between pages. Furthermore, integrated moving images and active elements to capture the attention of users.
- Managed to build an online presence that opened doors and served as a showcase for clients to review my work.
